StowAway Standard Box Lid Stay Instructions:

1. Locate the metal lid stay and slide the end of the lid stay into the hole on the inner lid flange, (driver's side, approximately 11" from the back lip near the hinges). When installed, the lid stay will sit in place.

2. Open the lid fully, applying slight pressure to keep the lid wide open. Hold the other end of the lid stay against the lip on the driver's side of the base and install the other end (L-shaped) into the hole in the box.

Note: Only the bottom "L" end of the stay needs to be removed for the lid to close; the top portion of the lid stay can remain installed.
